

WELCOME to the 2024-2025 School Year @ ACS!

Hello my name is Mrs. Marie Coley and I would like to welcome you to my classroom at Anderson Christian School for a new and exciting year of learning and fun. I teach science for both middle school and high school classes. I reside here in Anderson with my family. My husband Jonathan and I have one daughter, Julia, who attends Clemson University. I received my degree from Erskine College where I majored in Chemistry and minored in Secondary Education. For 12 years, I have been the National Beta Club Sponsor for ACS and work as the AP Coordinator. At one time I taught an AP class as well. This year will happily be my 18th year, in total, teaching at ACS.

Science is a HUGE passion of mine and I have been given the blessing and opportunity to be able to teach it again this year. I look forward to exploring God's world with each of you here and being a part of helping you grow and develop toward the plan that God has for your life.

Thank you for all you do as parents, grandparents, and guardians while we work together in educating our young people for the future. I look forward to having a great school year with you!
